

Firm Profile

Protect what you build.

Who we are

Intepat is an intellectual property firm based in Bengaluru, advising on patents, trademarks, designs, and copyrights across India and international markets. Since 2009, we have helped inventors, startups, corporates, and research institutions secure, manage, and enforce their IP rights. Our core strengths lie in electronics, communications, software, AI, blockchain, mechanical systems, and life sciences. We work as an extension of our clients' teams: close to the technology, close to the business, and accountable for outcomes.

Founded in 2009 by Senthil Kumar, a Registered Indian Patent Agent with nearly two decades of IP practice, Intepat was built on a simple premise: Indian innovators deserve IP counsel that understands the technology as well as the commercial stakes. That principle continues to guide the firm today.

LEADERSHIP

Senthil Kumar

Founder & Managing Partner

Registered Indian Patent Agent and Trademark Agent. PGDIPRL, National Law School of India University. M.S. in Instrumentation Technology. Nearly two decades of IP practice, preceded by a background in process engineering in India's telecom sector. Specializes in patent strategy, drafting, and prosecution across electronics, communications, AI, and blockchain.

Kalaivani

Co-Founder & Head of Business Development

Leads client engagement, portfolio operations, and firm growth. Extensive experience managing IP portfolios across industries and jurisdictions, with a client-first focus on service delivery and long-term relationships.

WHAT MAKES US DIFFERENT

01. Techno-legal depth.

Registered patent agents and trademark attorneys with domain expertise across software, electronics, mechanical systems, AI, IoT, and life sciences. Specifications are drafted by professionals who understand the underlying technology and the prior art, not by packagers of disclosures.

02. Strategic, not transactional.

We shape IP strategies aligned with product launches, funding rounds, and market expansion, not just process filings.

03. Structured and transparent.

Defined scopes, predictable timelines, and transparent pricing.

What we do

Four practice areas. End-to-end coverage within each.

Patents

Search, drafting, filing, and prosecution.

- Patentability, Freedom-to-Operate, invalidity, and landscape searches
- Provisional and complete specification drafting
- Filing and prosecution before the Indian Patent Office, with PCT filing and international coordination
- Office action responses, pre-grant and post-grant oppositions, revocations
- Patent support services for in-house IP teams and foreign associates

Trademarks

Brand protection from clearance through enforcement.

- Knock-out and comprehensive trademark searches
- Registrability opinions
- Filing and prosecution in India and internationally through the Madrid Protocol
- Oppositions, rectifications, and watch services
- Renewals and portfolio management

Designs and Copyrights

Protection for product form and creative works.

- Industrial Design filing and prosecution in India and abroad
- Copyright registration, assignment, and licensing
- Enforcement coordination through counsel network

Global IP Filing

A single coordination point for international IP protection.

- International filing strategy and jurisdiction selection
- PCT national phase entries and Madrid Protocol filings
- Direct foreign filings for patents, trademarks, and designs
- Centralized docketing, deadline control, and reporting
- Local counsel coordination across 30+ active jurisdictions

OUR APPROACH

01 Integrated

Patents, trademarks, designs, and global filings coordinated under one team.

02 Transparent

Defined scopes, predictable timelines, and transparent pricing.

03 Accountable

Direct partner access, from first filing to final renewal.

Who we work with

Our clients range from Fortune 500 companies and Indian corporates to funded startups, universities, research laboratories, and individual inventors. What they share is a need for IP work that stands up under examination, in investor diligence, and in enforcement.

SECTORS

Consumer Electronics

Automotive

Aerospace & Defense

Medical Devices

Software & AI

Clean Energy

Life Sciences

Industrial Manufacturing

REPRESENTATIVE EXPERIENCE

Deep-tech portfolio building. Supported a Bengaluru-based drone company from early-stage filings through portfolio development in India and internationally, building a defensible position across successive growth stages.

Cross-border portfolio coordination. Advise on India-focused portfolio management for an automotive supplier, coordinating filings, prosecution, and renewals with overseas associate counsel.

Pre-investment IP diligence. Assisted a growth-stage AI company with Freedom-to-Operate review, portfolio restructuring, and trademark clearance ahead of international expansion.

Brand protection for market expansion. Coordinated Madrid Protocol trademark filings for a consumer electronics company entering European and Southeast Asian markets, with opposition defense and watch services post-registration.

University technology transfer support. Advised a research institute on patent portfolio structuring, licensing readiness, and commercialization pathways for a cluster of deep-tech inventions.
